Raupuha Shorthorns

1st June 2018 BULL SALE

Russell & Mavis Proffit

Welcome you to Raupuha Stud for our
Annual On Farm Bull Sale.

Russell & Mavis invite you to their 5th annual Shorthorn bull sale. We offer 12 quality 18 month bull on farm the 1st of June at 10am. While we haven't achieved our goal of 20-25 bulls in 5 year we are still really proud of the fact that we are getting repeat buyers coming back each year.

Raupuha Shorthorns were established in 1972 with my father Jeff purchasing in-calf heifers from Ian Thompson of Putaruru. Dad farmed them on steep hill country east of Stratford until 1996 then moved them to easier country 10 minutes out of Te Kuiti before moving to Mahoenui in 2003. Mavis purchased some cows in 2007 before we took the cows & farm over in 2008. We generally run around 100 cows including mated 14mths heifers. Our Aim is to produce quality Shorthorn cattle with good structure, temperament with balanced figures.

The Bulls are open for inspection any time.

Auction Note (Please Read)

We have entered all the bulls in the catalogue in tag order this year as we intend to run a slightly different auction.

All bulls are available for purchases by top bidder at the Auction from the start. The top bidder gets to choose which & how many lots they would like to purchase. The under bidder if their lot or lots are still there can then purchase their choice at their bid if they wish or we start the auction again.

If you have any queries please do not hesitate to contact me
Thank you.

Russell Proffit - 0273552927

Please bring this catalogue to the sale

PURCHASING REBATE

All intending purchasers **MUST** register at the sales office prior to the sale.

A purchasing rebate of 6 % will be paid to non participating livestock companies and recognized independent livestock agents with approved credit facilities introducing and/or accompanying new buyers to the sale.

Arrangements must be made with the auctioneer **PRIOR TO THE SALE AND SETTLEMENT MADE ON THE BUYERS BEHALF WITHIN 14 DAYS.**

Explanatory Notes

ESTIMATED BREEDING VALUES (EBVS)

An estimated Breeding Value EBV is an estimate of the genetic value of that particular animal for each trait measured.

ACCURACY

An accuracy is presented with each EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the less the animal's EBV are likely to change as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered to be low.

EBVs are provided for the following traits

GESTATION

GL Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs usually indicate easier calving and increased growth after birth, due to more days of growth compared to their contemporaries.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH

Milk: 200-Day Milk Ebv (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 and 400 day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MWT: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Smaller, or more moderate EBVs are generally more favourable.

FERTILITY

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

COMPARING EBVs:

The EBVs for Beef Shorthorns can not be compared with EBVs for animals of another breed. They should be compared with the current average EBVs for Australasian Beef Shorthorn shown below.

2018 SHORTHORN BREEDPLAN AVERAGES FOR 2016 BORN CALVES

DIR	DTRS	GL	Birth	200 Wt	400 Wt	600 Wt	Mat	Milk	SS	CWT	EMA	Rib	Rump	RBV%	IMF%
+1.0	+1.1	-1.7	+3.0	+27	+37	+50	+43	+6	+1.5	+34	+4.2	-0.4	-0.4	+1.0	+0.5

The Australasian Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the New Zealand Beef Shorthorn Association nor the ABRI oversee or audit the collection of this data.

The Self - Replacing Index

“The Self-replacing Index” ranks bulls on their ability to generate profit (profit per cow mated) in a herd situation in which some females are retained for breeding and surplus females, along with all males, are slaughtered.

The main drivers of profit addressed by the Index include (in order of economic importance):

- Direct and Maternal Calving Ease
- Growth, Meat Yield
- Cow Survival
- Finishing Ability
- Fertility
- Cow Efficiency

In short, selection on the Index is expected to favour production of a cowherd with excellent reproductive efficiency, rearing progeny with moderate-to-high growth rates and high yielding carcasses.

Comparing the lifetime profitability of two bulls:

The following example illustrates how potential differences in lifetime profitability can be approximated between bulls with different Indexes. These estimates of value differences may be conservative.

Two bulls with Self-replacing Indexes of \$40 and \$20 are mated to genetically similar cows. If each bull mates 200 cows during its lifetime, the first bull will generate \$2000 $(\$40-20)/2 \times 200$ more profit during its lifetime than the second bull (the \$20 profit advantage must be divided by 2 because a bull only passes half his genes on to each of his progeny).

The Dairy Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial dairy herd targeting the production of dairy beef progeny from dairy cows and heifers where all progeny are slaughtered. Steers are assumed marketed at 520 kg live weight (280 kg carcass weight and 6 mm fat depth) at 20 months of age. While calving ease is by far the most important profit driver in the Index, growth and to a lesser extent meat yield also contribute.

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by PGG Wrightson Limited (PGW), PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

O.S.H- Health & Safety Warning

We wish to advise that certain dangers exist in relation to livestock and their environment. Every effort will be taken to ensure the safety of intending buyers and visitors, however, visitors should take care to ensure their personal safety.

SPECIALISTS IN GENETICS PERFORMANCE

PGG Wrightson Genetics is a nationwide team of livestock breeding professionals, passionate about improving farm productivity through genetics.

- Ability to source a huge variety of different genetics to suit any farm or production requirements
- Backed by the largest livestock network in New Zealand
- Up-to-date with the latest innovations in livestock breeding
- Relevant knowledge, advice and support
- Achieve top results at live auction sales with our National Auctioneering team
- Understanding of your farming business
- Committed to helping you achieve your production goals

NOTES

WE'VE MADE **BULLS** MORE ATTRACTIVE.

The handsome beasts in this catalogue will look even more appealing on sale day, thanks to FMG – the country's leading rural insurer. With 14 days free Premier Bull Cover, they'll be automatically insured from the fall of the hammer, including their transit to the farm. And you can keep that cover going for the remaining 12 months for just 6.5% of the purchase price, for bulls up to the value of \$25,000. So don't miss this chance to buy bulls covered by FMG. It's a mighty attractive offer.

Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wordings at fmg.co.nz

We're here for the good of the country.

FMG
Advice & Insurance

Premier Bull Cover

What is Premier Bull cover?

All bulls auctioned at this sale up to the value of \$25,000 will automatically be covered under FMG's Premier Bull cover for 14 days at no cost to the purchaser.

Length of cover

To extend cover for the specified bull beyond 14 days you need to tick Premier Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

Your bull's value

Any bull covered under this policy must be purchased for \$25,000 or less.

For any bull purchased over \$25,000 talk to an FMG representative.

During the period of insurance, the specified animal is covered for:

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

What we will pay

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Disclaimer

Please note this is only a summary of the product and is subject to our specific product documentation. For full details, you should refer to the policy document. You can get these documents, and any other information you need, from your FMG representative, by calling us or visiting our website.
