Soil and Food on Earth

With new nitrogen reporting limits, Sustain is the easy way to meet your regulatory commitments without compromising growth. Sustain's innovative formula halves the amount of nitrogen lost through volatilisation compared to urea – so more nitrogen is retained for your pasture, giving you maximum efficiency for both the planet and your pocket.

Generously supplied by Ballance Agri-nutrients, and valued at \$608.35. Can be redeemed at any Ballance Fertiliser bulk store.
